Search System

Milestone 2

- Predefined queries
- Only one small set of synonyms

Milestone 3

- Development of a front-end to interact with the search system
- Multiple combinations of synonyms
- Fuzziness

Why have a search system
if we can't easily use it?

Cryptocurrencies

Bitcoin
Bitcoin is the first successful internet money based on peer-to-peer technology; whereby no central bank or authority is involved in the transaction and production of the Bitcoin currency. It was created by an anonymous individual/group under the name, Satoshi Nakamoto. The source code is available publicly as an open source project, anybody can look at it and be part of the developmental process. Bitcoin is changing the way we see money as we speak. The idea was to produce a means of exchange...

Kitcoin
Kitcoin, a cryptocurrency based on its own newly developed next generation blockchain, serves as payment solution of the future. It's superior blockchain technology, driven by a newly-developed consensus mechanism, enables it to scale to millions of transactions per second. This makes Kitcoin the preferred choice for merchant adoption and consumer

Gitcoin
Gitcoin is a platform to fund builders looking for meaningful, open source work.

Cryptocurrency

Description

Bitcoin is the first successful internet money based on peer-to-peer technology; whereby no central bank or authority is involved in the transaction and production of the Bitcoin currency. It was created by an anonymous individual/group under the name, Satoshi Nakamoto. The source code is available publicly as an open source project, anybody can look at it and be part of the developmental process. Bitcoin is changing the way we see money as we speak. The idea was to produce a means of exchange, independent of any central authority, that could be transferred electronically in a secure, verifiable and immutable way. It is a decentralized peer-to-peer internet currency making mobile payment easy, very low transaction fees, protects your identity, and it works anywhere all the time with no central authority and banks. Bitcoin is designed to have only 21 million BTC ever created, thus making it a deflationary currency. Bitcoin uses the SHA-256 hashing algorithm with an average transaction confirmation time of 10 minutes. Miners today are mining Bitcoin using ASIC chip dedicated to only mining Bitcoin, and the hash rate has shot up to peta hashes. Being the first successful online cryptography currency, Bitcoin has inspired other alternative currencies such as Litecoin, Peercoin, Primecoin, and so on. The cryptocurrency then took off with the innovation of the turing-complete smart contract by Ethereum which led to the development of other amazing projects such as EOS, Tron, and even crypto-collectibles such as CryptoKitties.

Fuzziness

- The user can search a term with a typo and still get relevant results.

- *Levenshtein* edit distance:

  - Number of one-character changes needed to turn one term into another.

- *Elasticsearch* has a built-in query parameter to allow fuzziness:

  - "fuzziness": "auto"

  - Edit distance is based on the length of the term.

Hitchain

HitChain is a decentralized and collaborative community built to value developers' works with a transparent credit system using blockchain technology. It is a community of the developers, by the developers, for the developers. HitChain provides a platform for developers to automatically redeem the value of...

Synonyms

Two types of synonyms:

- Synonyms for popular words in our domain, obtained from a dictionary API.

- The symbols (sequences of letters) that represent each coin and are commonly used instead of the full name.
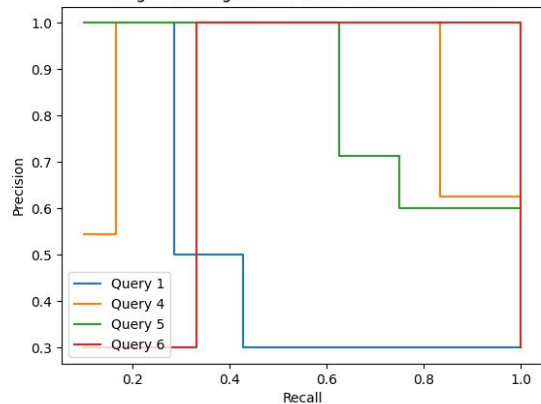

We came up with several combinations of synonyms using these two sources.
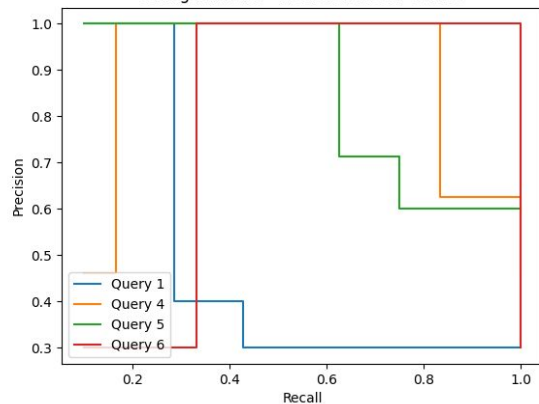

Comparing the different systems

0	Original Configuration	• Configuration used in M2
1	Configuration 1	• Original configuration + • Synonyms from the dictionary API
2	Configuration 2	• Configuration 1 + • Removal of irrelevant synonyms
3	Configuration 3	• Original configuration + • Symbol synonyms
4	Configuration 4	• Mix of configurations original, 2 and 3
